

Dear Mayor Leppert, Environmental Protection Agency (EPA) Regional Administrator Greene, and North Central Texas Council of Governments (NCTCOG) Executive Director Eastland,

Environmental improvement is achieved through cooperative action. Energy Xtreme is pleased to partner with the City of Dallas, US EPA, and NCTCOG to work towards implementing sustainable practices that help improve Dallas' air quality. Through the Dallas Sustainable Skylines Initiative, Energy Xtreme pledges to support one or more of the following project categories:

- Enhancing central city livability  
Brief project description:  
Proposed measurement of results:
- Promoting green buildings and developments  
Brief project description:  
Proposed measurement of results:
- Implementing and promoting renewable energy/energy efficiency  
Brief project description: Reduce idling from government/private fleet vehicles by promoting the Xtreme Power APU and offering free installation for all new units and retrofits in the DFW area (estimated at a \$700 cost savings for the client).  
Proposed measurement of results: Number of units sold multiplied by the average idling time that can be reduced and the pollution savings per hour of idling reduced. (If one vehicle reduces idle time by 2 hours, emissions savings can equal 13,800 pounds of CO2 per year)
- Reducing emissions from stationary and area sources  
Brief project description:  
Proposed measurement of results:
- Reducing air emissions from off-road equipment  
Brief project description:  
Proposed measurement of results:

As members of the Dallas community, we recognize our responsibility to be good environmental stewards and manage our environmental impacts in a way that provides for a sustainable future. We look forward to building a sustainable Dallas with you.

Sincerely,

*Robyn Knecke*  
Energy Xtreme

The **Dallas Sustainable Skylines Initiative** is a joint effort with the primary goal of implementing sustainable practices to help improve Dallas' air quality. Through Initiative-guided voluntary projects, the Initiative aims to achieve measurable environmental benefits--particularly the reduction of air emissions, but also the significant improvement of water and land quality--while simultaneously contributing to the vitality of the Dallas economy and the quality of life of Dallas' citizens. In the longer term, the Initiative aims to create a successful and reproducible program that serves as a model for other cities.
