Measurable
Environmental
Benefits

Initiative-guided
projects

Voluntary
Partnerships

Dear Mayor Leppert, Environmental Protection Agency (EPA) Regional Administrator Greene, and North Central Texas Council of Governments (NCTCOG) Executive Director Eastland,

Environmental improvement is achieved through cooperative action. Standard Renewable Energy is pleased to partner with the City of Dallas, US EPA, and NCTCOG to work towards implementing sustainable practices that help improve Dallas' air quality. Through the Dallas Sustainable Skylines Initiative, Standard Renewable Energy pledges to support one or more of the following project categories:

- Enhancing central city livability
Brief project description:
Proposed measurement of results:
- Promoting green buildings and developments
Brief project description:
Proposed measurement of results:
- Implementing and promoting renewable energy/energy efficiency
Brief project description: Provide the Trinity River Audubon Center with two educational carts consisting of a Solar Module, a small-scale wind turbine and an inverter that can be used for educational purposes about the way renewable energy is generated and converted for our use.
Proposed measurement of results: As a purely educational project, the number of education events and participants at these events will be counted.
- Reducing emissions from stationary and area sources
Brief project description:
Proposed measurement of results:
- Reducing air emissions from off-road equipment
Brief project description:
Proposed measurement of results:

As members of the Dallas community, we recognize our responsibility to be good environmental stewards and manage our environmental impacts in a way that provides for a sustainable future. We look forward to building a sustainable Dallas with you.

Sincerely,

Tom Stumpf

Account Manager, Standard Renewable Energy

The **Dallas Sustainable Skylines Initiative** is a joint effort with the primary goal of implementing sustainable practices to help improve Dallas' air quality. Through Initiative-guided voluntary projects, the Initiative aims to achieve measurable environmental benefits--particularly the reduction of air emissions, but also the significant improvement of water and land quality--while simultaneously contributing to the vitality of the Dallas economy and the quality of life of Dallas' citizens. In the longer term, the Initiative aims to create a successful and reproducible program that serves as a model for other cities.
